INTRODUCTION

A **Quotation System** is an online platform that allows businesses to generate and provide price quotations for their products or services. It streamlines the quoting process by automating calculations, customizing estimates, and facilitating communication between businesses and customers.

How it works

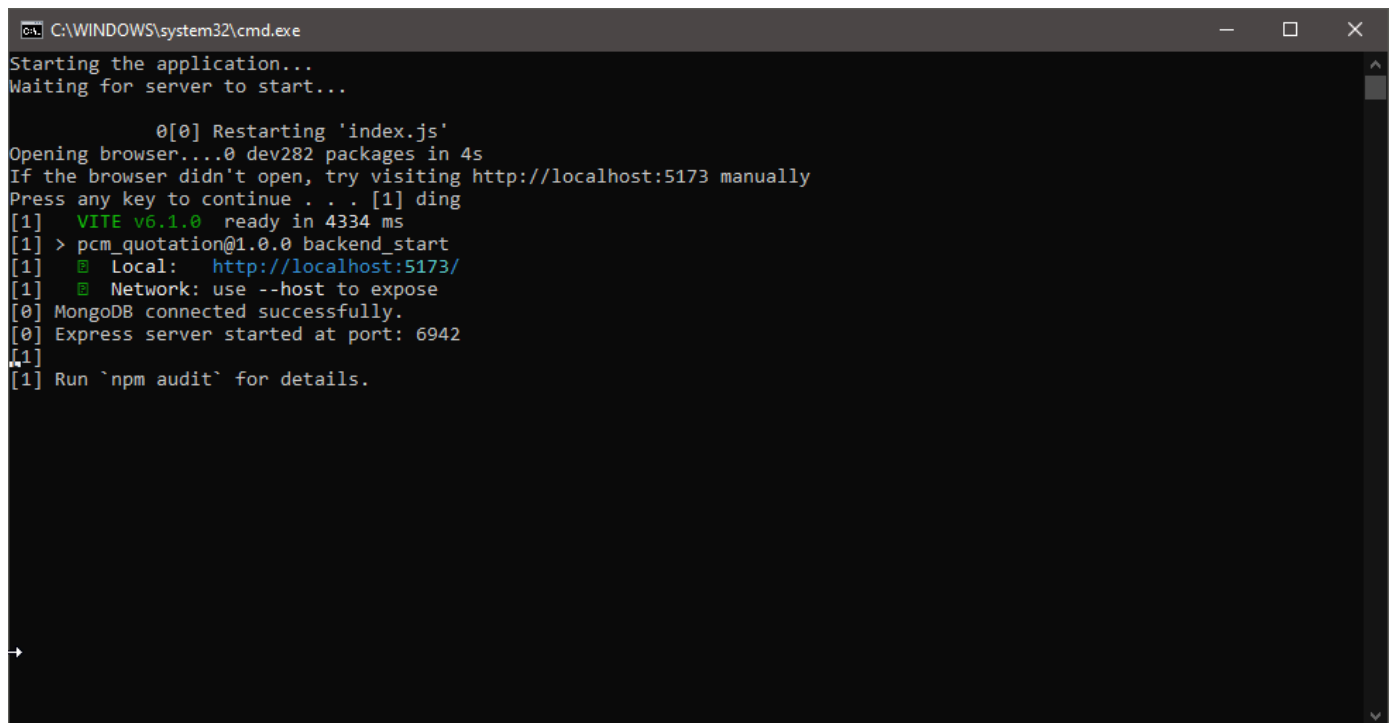

1. **Customer Requests a Quote** – Clients enter details about the product or service they need.
2. **System Generates a Quote** – The website calculates the estimated cost based on predefined pricing models.
3. **Business Reviews & Approves** – The business can modify or approve the quote before sending it.
4. **Customer Receives the Quote** – The customer can review, negotiate, or accept the quote.
5. **Finalization** – If accepted, the quote can be converted into an invoice or contract.

HOW TO USE

How to open the System

Step 1. Open the file explorer and open the folder named **PCM QUOTATION.**

Step 2. Inside the folder, double click the file named **startup.bat**

```
C:\WINDOWS\system32\cmd.exe
Starting the application...
Waiting for server to start...

    0[0] Restarting 'index.js'
Opening browser...0 dev282 packages in 4s
If the browser didn't open, try visiting http://localhost:5173 manually
Press any key to continue . . . [1] ding
[1] VITE v6.1.0 ready in 4334 ms
[1] > pcm_quotation@1.0.0 backend_start
[1]   Local: http://localhost:5173/
[1]   Network: use --host to expose
[0] MongoDB connected successfully.
[0] Express server started at port: 6942
[1]
[1] Run `npm audit` for details.
```

Upon clicking the file, a small window will show up. This will run the necessary programs needed to open the system.

Step 3. After the small window showed up, wait for a few seconds and your browser will automatically open and this will launch the Quotation System.
